

Exercise 4.2: Application Workflow And Access Patterns

In this exercise, you will:

- Finish the application workflow based KillrVideo query requirements
- Add the remaining access patterns based on KillrVideo query requirements

Steps

Using the following KillrVideo tasks, finish filling out the application workflow diagram and access patterns.

- Find comments posted by a user with a known id (show most recently posted comments first)
- Find comments posted for a video with a known id (show most recent comments first)
- Find an average rating with a known video id
- Find trailers for a video with a known id

- Find video interactions for a user with a known id and specified video id (show most recent interactions first)
- Find actors for a video with a known id
